

Thematic Training Day

Bioscience for Health

Biomolecular Sciences Building, University of St Andrews

Tuesday 4th July 2017

THEME: Novel Technologies in Bioscience

Organiser: Luke Woodford

10.30am	Arrival and coffee
11.00am	Dr Silvia Paracchini <i>'The technologies driving the field of human genetics'</i>
12.00pm	Professor Mark Blaxter <i>'Next gen sequencing for discovery, hypothesis testing and analysis (in tardigrades, nematodes and other interesting organisms)'</i>
1.00pm	Lunch
2.00pm	Dr Janet Cox-Singh <i>'Malaria parasites and disease – will parasite genome sequencing open research bottlenecks?'</i>
3.00pm	Professor Matthew Holden <i>'Bad bugs and drugs, using genomics to investigate the emergence and spread of MRSA'</i>
4.00pm	<i>Finish</i>
